To Whom It May Concern

**Travel Authorization for Essential Third-Party Contractors**

Under recent guidelines issued in response to public health concerns and restrictions based on the on-going response to COVID-19, American Water Resources, a subsidiary of American Water, engages third-party contractors to perform critical work during the current coronavirus pandemic.

American Water Resources is operating under the assumption that certain third-party contractors are exempt from travel and work restrictions because they are performing an essential service for residential homeowners.

The bearer of this letter accompanied with a valid driver's license is deemed to be an essential third-party contractor maintaining the safety, sanitation and essential operations of residences and/or businesses working on behalf of American Water Resources. This letter does not supersede enforcement of the state Vehicle Code or other applicable laws or regulations.

To the extent you have any question regarding this Travel Authorization, please contact Cesar Martinez, Contractor Network Manager, at 630-742-4363.
